PUBLIC HEALTH REPORTS.

UNITED STATES.

[Reports to the Surgeon-General United States Marine-Hospital Service.]

Texas establishes quarantine from April 15, 1902.

AUSTIN, TEX., March 21, 1902.

SIR: I inclose herewith proclamation by the governor of Texas putting on quarantine April 15, 1902.

Respectfully,

GEORGE R. TABOR,
State Health Officer of Texas.

Proclamation by the governor of the State of Texas.

Be it known, that I, Joseph D. Sayers, governor of the State of Texas, by authority vested in me by the laws of this State, do hereby declare that quarantine shall be established on the gulf coast and Rio Grande border on and after April 15, 1902, and it shall continue until closed by proclamation.

Said quarantine shall apply to all vessels, persons, or things coming from places infected by yellow fever, smallpox, bubonic plague, or cholera, and all places south of 25 degrees north latitude shall be considered infected unless proof to the contrary be submitted to the State health officer, and special exemption be granted to said places, and persons from such places are prohibited from entering this State within a period of ten days.

I further declare quarantine against any person or persons infected or liable to be infected with yellow fever, smallpox, bubonic plague, or cholera, either within or without the State, and direct the quarantine officers of the State and health officers of the counties and towns to establish local quarantine around any and all such persons whenever discovered.

The coast quarantine stations will be governed by the following rules:

Rule 1. Ten days must have elapsed, from the day of sailing from an infected point, before vessel will be allowed to enter the ports of Texas, except fruit vessels and such vessels as have been given written permits to do so.

Rule 2. Vessels arriving outside the bar of Texas ports, with sickness on board at the time of arrival, of either yellow fever, smallpox, bubonic plague, or cholera, must not be brought inside of the bar by the pilots, but must be at once reported to the local quarantine officer, who will at once report same to the State health officer, and he will endeavor to have such vessel ordered to the nearest U. S. Marine-Hospital station for treatment.

Rule 3. Vessels from an infected place, having had sickness or deaths en route, but having no sickness at the time of arrival, will be disinfected and held five full days after disinfection, under observation, before being released, and a longer time if considered necessary by the State health officer.

Rule 4. Vessels from places actually infected, and having been at sea longer than ten days, will be disinfected and held under observation five full days, unless special permission is given by the State health officer to enter sooner.

Rule 5. Vessels from places south of 25 degrees north latitude, with clean bills of health, and having had no sickness on board, will be disinfected and held three days after disinfection, unless special permission is given by the State health officer to enter sooner.

Rule 6. Iron steamships arriving from noninfected ports south of 25 degrees north latitude, with no cargo or passengers, with clean bills of health from last clearance and the clearance preceding the last, and in good sanitary condition at the time of arrival, may be

permitted to enter after being disinfected, without further detention, if, in the judgment of the local quarantine officers, it is safe to do so.

Rule 7. Vessels wishing to engage in the fruit, cattle, or crude petroleum trade will be allowed to do so under special restrictions and regulations governing the same.

All officials, military authorities, and citizens of Texas are solicited to assist the quarantine officers in the execution of the above rules, and are earnestly requested to notify the governor of any dereliction of duty by officers or employees, or any other facts that will give greater efficiency to the quarantine service.

In testimony whereof, I have hereunto signed my name and have caused the seal of the State to be affixed at the city of Austin this the 20th day of March, A. D. 1902.

JOSEPH D. SAYERS, Governor.

By the governor :

JOHN G. TODD, *Secretary of State.*

Vessels from Cape Town, South Africa, no longer detained at Pensacola, plague at Cape Town having ceased.

KEY WEST, FLA., March 17, 1902.

SIR: I have the honor to report that inquiry having been made of me by mail, from Acting Asst. Surg. R. C. White, U. S. Marine-Hospital Service, at Pensacola, as to detention of vessels from Cape Town, South Africa, and inclosing me bills of health from the United States consul-general at Cape Town and bills of health from English authorities, I have replied to him by wire as follows:

KEY WEST, FLA., March 15, 1902.

WHITE, *Pensacola, Fla.*: Cape Town being reported free plague no detention necessary for that cause.—PORTER.

The note on Consul-General Bingham's bill of health January 10, 1902, is:

The last case of plague in Cape Town was discovered on October 21, and the last case of plague was discharged from treatment on November 27. No cases of plague are known to exist in Cape Town or surroundings.

Respectfully,

JOSEPH Y. PORTER,
Sanitary Inspector, U. S. M. H. S.

Inspection service at Vanceboro, Me., and vicinity.

VANCEBORO, ME., March 15, 1902.

SIR: For the week ended to-night, I have inspected about 800 passengers at this port; of whom I vaccinated 108, chiefly from the north shore of New Brunswick.

The smallpox at Fredericton remains as at my last report, no epidemic having followed the exposures, and unless something new should occur, a continuation of the inspection seems, in my opinion, unnecessary.

Respectfully,

M. L. YOUNG,
Acting Assistant Surgeon, U. S. M. H. S.

Arrival at Reedy Island Quarantine of vessels from West Indian ports.

REEDY ISLAND QUARANTINE,
via Port Penn, Del., March 16, 1902.

SIR: Through the medical officer in command of national quarantine service on Delaware Bay and River, I have the honor to report the arrival at this station of the following vessels:

March 9, 1902, British steamship *Russian Prince*, from Havana, with molasses; no passengers; bill of health signed by Surgeon Glennan.

March 11, 1902, Norwegian steamship *Helga*, from St. Thomas, via

Santiago de Cuba, with ore; no passengers; bill of health signed by Assistant Surgeon Von Ezdorf.

Respectfully,

T. F. RICHARDSON,
Assistant Surgeon, U. S. M. H. S., In Command.

Arrival at Baltimore of vessels from West Indian and South American ports.

BALTIMORE, MD., March 15, 1902.

SIR: I have to report the arrival of the following vessels at this port for the week ended this day: March 11, British steamship *Lord Lansdowne*, from Daiquiri, Cuba, with ore. March 12, American bark *Julia Rollins*, from Rio de Janeiro, with coffee. March 14, American bark *Dom Pedro II*, from Rio de Janeiro, with coffee. March 15, British steamship *Kestor*, from Santiago de Cuba, with ore; British steamship *Alabama*, from Daiquiri, Cuba, with ore; Norwegian steamship *Storfond*, from Daiquiri, Cuba, with ore.

Respectfully,

T. E. CUNNINGHAM,
Special Deputy Collector.

REPORTS FROM THE MEXICAN BORDER.

El Paso, Tex., March 15, 1902—Inspection service.—I have the honor to submit herewith summary of transactions at this station for the week ended March 15, 1902: Inspection of Mexican Central Railroad passengers, 239; inspection of Rio Grande and Pacific Railroad passengers, 15; inspection of Mexican immigrants, 106; vaccination of children of immigrants, 8; disinfection of carload of cattle hides.

E. ALEXANDER,
Acting Assistant Surgeon, U. S. M. H. S.

Laredo, Tex., March 11, 1902—Inspection service.—I have the honor to submit following inspection report for week ended March 8, 1902: Number of passenger trains from Mexico inspected, 14; persons on passenger trains from Mexico inspected, 523; immigrants inspected and passed, 34; immigrant children vaccinated, 13.

Laredo, Tex., March 18, 1902—Inspection service.—I have the honor to submit the following inspection report for the week ended March 15, 1902: Number of passenger trains from Mexico inspected, 14; persons on trains from Mexico inspected, 485; immigrants inspected and passed, 20; immigrants vaccinated upon entry, 5.

H. J. HAMILTON,
Acting Assistant Surgeon, U. S. M. H. S.

Statistical reports of States and cities of the United States—Yearly and monthly.

ALABAMA—*Birmingham.*—Month of February, 1902. Estimated and census population, 38,415. Total number of deaths, 71, including enteric fever, 1; scarlet fever, 3, and 7 from tuberculosis.

CALIFORNIA—*Oakland.*—Month of February, 1902. Estimated population, 75,000. Total number of deaths, 98, including diphtheria, 1; enteric fever, 1; scarlet fever, 1, and 9 from phthisis pulmonalis.

CONNECTICUT.—Reports to the State board of health, for the month of February, 1902, from 168 towns having an aggregate census population of 908,355, show a total of 1,124 deaths, including diphtheria, 18;

enteric fever, 6; measles, 2; scarlet fever, 19; whooping cough, 6; smallpox, 2, and 94 from phthisis pulmonalis.

Bridgeport.—Month of February, 1902. Estimated population, 72,000. Total number of deaths, 99, including diphtheria, 2; enteric fever, 1; whooping cough, 1, and 10 from tuberculosis.

INDIANA—*Evansville.*—Month of February, 1902. Estimated population, 65,000. Total number of deaths, 56, including scarlet fever, 1, and 11 from tuberculosis.

MICHIGAN.—Reports to the State board of health, Lansing, for the week ended March 15, 1902, from 70 observers, indicate that phthisis pulmonalis, measles, inflammation of bowels, erysipelas, intermittent fever, dysentery, and diphtheria were more prevalent, and diarrhea, enteric fever, and remittent fever were less prevalent than in the preceding week. Meningitis was reported present at 5, whooping cough at 17, diphtheria at 27, enteric fever at 45, measles at 71, scarlet fever at 109, smallpox at 145, and phthisis pulmonalis at 207 places.

The Monthly Bulletin of Vital Statistics says:

There were 2,665 deaths returned to the department of State for the month of February, a decrease of 160 from the number returned for the preceding month. As February is a shorter month than January, the death rate, on the contrary, showed an increase from 13.5 to 14 per 1,000 population. The month of February, 1901, had 3,084 deaths, or 16.3 per 1,000 population. There were 422 deaths of infants under 1 year; 150 deaths of children aged 1 to 4 years, and 897 deaths of elderly persons over 65 years. Important causes of death were as follows: Tuberculosis of lungs, 152; other forms of tuberculosis, 21; typhoid fever, 38; diphtheria and croup, 38; scarlet fever, 20; measles, 16; whooping cough, 18; pneumonia, 369; meningitis, 45; influenza, 78; cancer, 114; accidents and violence, 100. There were 4 deaths from smallpox during the month, 1 in each of the following districts: Alma village, Gratiot County; Cannon Township, Kent County; Reed City village, Osceola County, and Onaway village, Presque Isle County. Two deaths were also reported from chickenpox, which term, with other designations, like "Cuban itch," sometimes indicates smallpox. These deaths were in Handy Township, Livingston County, and Delray village, Wayne County. There were also 2 deaths from mumps, 1 in Clinton County and 1 in Lapeer County.

MINNESOTA—*Minneapolis.*—Month of February, 1902. Estimated population, 240,000. Total number of deaths, 126, including diphtheria, 6; enteric fever, 2; scarlet fever, 1; whooping cough, 1, and 17 from tuberculosis.

St. Paul.—Month of February, 1902. Estimated population, 170,000. Total number of deaths, 147, including diphtheria, 7; scarlet fever, 5, and 26 from tuberculosis.

MISSOURI—*St. Louis.*—Year ended December 31, 1901. Estimated population, 598,000—white, 560,000; colored, 38,000. Total number of deaths, 10,601—white, 9,428; colored, 1,173—including diphtheria, 259; enteric fever, 198; measles, 34; scarlet fever, 69; whooping cough, 81; smallpox, 9, and 1,570 from tuberculosis.

Month of February, 1902. Total number of deaths, 947—white, 836; colored, 111—including diphtheria, 19; enteric fever, 16; measles, 2; scarlet fever, 9; whooping cough, 7; smallpox, 1, and 130 from tuberculosis.

NEW YORK—*Middletown*.—Month of February, 1902. Estimated and census population, 15,000. Total number of deaths, 23. No deaths from contagious diseases.

Yonkers.—Month of February, 1902. Estimated population, 50,000. Total number of deaths, 69, including diphtheria, 2, and 7 from phthisis pulmonalis.

NEW HAMPSHIRE—*Franklin*.—Month of February, 1902. Estimated population, 5,843. Total number of deaths, 9, including 2 from enteric fever.

OHIO—*Zanesville*.—Month of February, 1902. Estimated population, 28,000. Total number of deaths, 29, including diphtheria, 2, and 4 from tuberculosis.

PENNSYLVANIA—*Scranton*.—Month of February, 1902. Estimated population, 102,026. Total number of deaths, 97, including diphtheria, 2; enteric fever, 1, and 6 from tuberculosis.

TENNESSEE—*Nashville*.—Month of February, 1902. Estimated population, 81,320—white, 51,128; colored, 30,192. Total number of deaths, 196—white, 111; colored, 85—including scarlet fever, 1, and 31 from tuberculosis.

TEXAS—*San Antonio*.—Month of February, 1902. Estimated population, 63,000. Total number of deaths, 155, including diphtheria, 1; enteric fever, 1; whooping cough, 1, and 52 from tuberculosis, of which 36 were of nonresidents.

UTAH—*Salt Lake City*.—Month of February, 1902. Census population, 53,531. Total number of deaths, 64, including diphtheria, 5; enteric fever, 1; measles, 4; scarlet fever, 5, and 5 from tuberculosis.

WASHINGTON—*Seattle*.—Month of February, 1902. Estimated population, 110,000. Total number of deaths, 85, including diphtheria, 1; enteric fever, 5; scarlet fever, 3; smallpox, 1, and 8 from tuberculosis.

WISCONSIN—*Milwaukee*.—Month of February, 1902. Estimated population, 300,000. Total number of deaths, 274, including diphtheria, 4; enteric fever, 3; measles, 2; scarlet fever, 2, and 23 from tuberculosis.

Reports from Bahia.

BAHIA, BRAZIL, *February 2, 1902.*

SIR: I beg leave to report that for the week ended February 1, 1902, there were reported 84 deaths in Bahia. The following are the chief causes of death: Aneurism, 1; arterio-sclerosis, 4; beriberi, 3; bronchitis, 1; whooping cough, 1; diarrhea, 2; enteritis, 3; malarial fever, 7; gastritis, 1; hepatitis, 2; influenza, 1; elephantiasis, 1; meningitis, 1; senile debility, 1; stillborn, 5; pneumonia, 5; peritonitis, 1; syphilis, 2; tetanus, 1; tuberculosis, 12, and other causes, 29.

Respectfully,

ADOLPH HIRSCH,
United States Vice-Consul.

HON. SECRETARY OF THE TREASURY.

BAHIA, BRAZIL, *February 10, 1902.*

SIR: I beg leave to report that for the week ended February 8, 1902, there were reported 68 deaths in Bahia. The following are the chief causes of death: Arterio-sclerosis, 5; beriberi, 4; bronchitis, 1; whooping cough, 1; diarrhea, 1; scrofulosis, 1; enteritis, 1; malarial fevers, 7; gangrene, 1; gastritis, 7; meningitis, 1; senile debility, 1; stillborn, 2; pneumonia, 2; tetanus, 1; tuberculosis, 7, and other causes, 25.

Respectfully,

ADOLPH HIRSCH,
United States Vice-Consul.

HON. SECRETARY OF THE TREASURY.

BAHIA, BRAZIL, *February 17, 1902.*

SIR: I beg leave to report that for the week ended February 15, 1902, there were reported 53 deaths in Bahia. The following were the chief causes of death: Arterio-sclerosis, 5; beriberi, 3; bronchitis, 2; cirrhosis of liver, 2; enteritis, 2; malarial fevers, 4; gastritis, 1; senile debility, 1; stillborn, 3; syphilis, 1; tetanus, 4; cardiac syncope, 4; tuberculosis, 4, and other causes, 17.

Respectfully,

ADOLPH HIRSCH,
United States Vice-Consul.

HON. SECRETARY OF THE TREASURY.

BAHIA, BRAZIL, *February 24, 1902.*

SIR: I beg leave to report that for the week ended February 22, 1902, there were reported 87 deaths in Bahia. The following were the chief causes of death: Aneurism, 1; arterio-sclerosis, 1; beriberi, 2; bronchitis, 5; cachexia, 1; diarrhea, 1; enteritis, 1; malarial fevers, 9; gas-

tritis, 8; hepatitis, 1; senile debility, 2; nephritis, 1; stillborn, 1; pneumonia, 3; syphilis, 1; tetanus, 5; cardiac syncope, 2; tuberculosis, 12; other causes, 30.

Respectfully,

ADOLPH HIRSCH,
United States Vice-Consul.

Hon. SECRETARY OF THE TREASURY.

CANADA.

Births, marriages, and deaths in Montreal in 1900.

MONTREAL, CANADA, March 13, 1902.

The health department of the city of Montreal only a few days ago issued its annual report for the year 1900. It deals with the city's death rate, birth rate, marriages, population, etc. The figures are somewhat startling to the people. The impression has prevailed that Montreal is a very healthy city. The death rate is given at 25.46 per 1,000 for 1900, against 24.51 in 1899 and 20.66 in 1898. The birth rate is given at 34.26 per 1,000 for 1900, against 34.45 in 1898. The marriage rate has also fallen off slightly, being 7.76 per 1,000 in 1900, against 8.12 in 1899 and 8 in 1898. The total number of deaths in 1900 is given as 7,351, and the rate per 1,000 of the population 25.46 is enormously high when compared with the death rate of other large cities on this continent. In New York, with its huge congested and poverty stricken districts and its hot summer climate, the death rate is only 19.95 per 1,000. In Boston it is 19.06; in Chicago, 14.68; in Buffalo, 14.19. Even in New Orleans the death rate is only 24.94.

Civic officials put forth the contention that the cause of the death rate in Montreal being far heavier than what it should be is the result of the heavy mortality among infants.

It is well known that sanitary conditions are no little to blame for the slaughter of the "innocents." The medical health officer has frequently declared that the existence of privy pits has much to do with the heavy death rate among infants; nevertheless, the obnoxious pits still remain. It is a fact that there are weeks in the heat of summer when 125 infants die. The total death rate of the entire city should not average over 100 per week.

The following table, taken from the annual report for 1900, gives a very complete review of this whole subject. It gives the exact figures of deaths, marriages, births, etc., since 1884.

Year.	Population.	Deaths.	Rate per 1,000 of population.	Births.	Rate per 1,000 of population.	Marriages.	Rate per 1,000 of population.
1884	162,959	4,358	26.74	6,728	41.28	1,513	9.28
1885	167,501	7,825	46.71	6,303	37.62	1,495	8.92
1886	183,504	4,655	25.36	8,326	45.37	1,931	10.52
1887	189,501	5,286	27.96	8,249	43.63	1,984	10.46
1888	201,743	5,824	28.86	8,685	42.91	2,804	10.92
1889	210,000	5,588	26.60	8,680	41.33	2,107	10.03
1890	216,300	5,365	24.80	8,672	40.09	2,080	9.61
1891	218,268	5,391	24.24	9,576	43.87	2,107	9.65
1892	224,816	5,507	24.49	9,454	42.05	2,149	9.55
1893	231,560	5,782	23.96	10,080	23.53	2,273	9.81
1894	241,748	6,594	27.27	10,714	44.29	2,188	9.05
1895	249,000	6,179	24.81	10,055	40.38	2,011	8.07
1896	256,470	5,622	21.92	9,592	37.40	1,902	7.40
1897	264,164	6,035	22.48	9,184	34.76	1,885	7.13
1898	272,389	5,622	20.66	9,433	34.66	2,179	8.00
1899	280,251	6,871	24.51	9,655	34.45	2,277	8.12
1900	288,658	7,351	25.46	9,892	34.26	2,440	7.76

Death rate in other cities.

Some statistics have been procured by the health department as to the death rate in other cities. Of 100 cities in America from which statistics could be secured, Three Rivers has the highest death rate, and Hamilton, Ontario, the lowest. For 19 North American cities, it was shown the average death rate was 20.1 per 1,000. For 75 European cities the average death rate is shown to be 19.7. For 6 South American cities the rate was shown to be 32.1.

Commenting on this report the Montreal Star has the following:

"Assuming the population to be 250,000, Montreal loses 6,250 lives a year. Why should we lose 2,245 more than Louisville, Ky.?"

"Why should 3,873 more people die here than in St. Paul; 3,580 more than in Minneapolis? Coming nearer home, why should we lose 2,703 per year more than the same population of Buffalo? Why is it that a great city like New York, with its herds of all kinds of people flocking in from the four quarters of the earth, its intense heat in summer, its dense population, crowded tenement districts, why should such a city actually lose 1,438 fewer lives per 250,000 than Montreal?"

"Why should our death rate be higher than Memphis, Tenn., or New Orleans, with their frequent ravages of fevers unknown in our climate? Why should Montreal in 1900 lose a larger percentage of its population than any other city on the continent, with the single exception of Savannah, Ga.?"

JOHN L. BITTINGER,
Consul-General.

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

CHINA.

Two more deaths from cholera at Canton.

DEPARTMENT OF STATE,
Washington, D. C., March 17, 1902.

SIR: I have the honor to advise you for the information of the U. S. Marine-Hospital Service of the receipt of the following telegram dated the 14th instant from the consul of the United States at Canton, China:

Fritz Brockelmann, Swedish-Norwegian merchant consul, died to-day, cholera; also, sailor French gunboat *Avalanche*.

Respectfully,

JOHN HAY,
Secretary of State.

HON. SECRETARY OF THE TREASURY.

Cholera spreading in Seungshan—Abating in Canton.

DEPARTMENT OF STATE,
Washington, D. C., March 20, 1902.

SIR: I have the honor to advise you for the information of the U. S. Marine-Hospital Service of the receipt of a telegram dated the 19th instant from the consul of the United States at Canton, China, as follows:

Cholera spreading in Seungshan, abating Canton.

Respectfully,

JOHN HAY,
Secretary of State.

HON. SECRETARY OF THE TREASURY.

Cholera raging at Fatshan.

DEPARTMENT OF STATE,
Washington, D. C., March 22, 1902.

SIR: For the information of the U. S. Marine-Hospital Service, I have the honor to advise you of the receipt of a telegram from the consul of the United States at Canton, China, dated to-day as follows:

Cholera raging in Fatshan, abating decidedly Canton.

Respectfully,

JOHN HAY,
Secretary of State.

HON. SECRETARY OF THE TREASURY.

CUBA.

Reports from Oienfuegos, Casilda, and Santa Cruz del Sur.

CIENFUEGOS, CUBA, March 17, 1902.

SIR: Through the chief quarantine officer for the island of Cuba, I have the honor to forward the following weekly report of the transactions in the district under my command, for the week ended March 15, 1902:

Ten deaths have occurred in this city; of these 1 occurred in the civil hospital. No contagious diseases reported. Causes of death as follows: Tuberculosis, 4; paludism, 1; anemia, 1; aneurism, 1; insufficiency, aortic, 1; entero-colitis, 1; stillborn, 1. Death rate per 1,000 inhabitants, 13.04. Ten vessels inspected and passed, granted free pratique; 3 vessels admitted without inspection; 14 bills of health issued vessels leaving this port, and 1 alien steerage passenger inspected and allowed to land.

Seven of the cases of parotitis, left behind for medical treatment by the battleship *Indiana*, were discharged from the "Quinta de Salud" March 11; clothing, hammocks, and bedding of patients were disinfected under my personal supervision, and after changing clothing the patients were taken on board the gunboat *Yankton*.

The following cases are still in hospital under treatment, visited daily by Dr. Stuart of the *Yankton*: Parotitis, 2; bronchitis, 1; pleurisy, 1; bubo (nonvenereal), 1; syphilis, 1.

Casilda.—Acting Asst. Surg. Alejandro Cantero reports 6 deaths in the city of Trinidad. No contagious diseases reported; 11 vessels inspected and passed, granted free pratique; 8 bills of health issued vessels leaving Casilda, and no alien steerage passengers landed at that port.

Santa Cruz del Sur.—Acting Asst. Surg. Pedro M. Quevedo reports no deaths at that port during week ended March 8. No contagious diseases reported in that vicinity; 4 vessels inspected and passed, granted free pratique; 5 bills of health issued vessels leaving that port, and no alien steerage passengers landed at that port.

Respectfully,

FELIX GIRALT,
Acting Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,

U. S. Marine-Hospital Service.

*Inspection of immigrants at Cienfuegos during the week ended March 15, 1902.*CIENFUEGOS, CUBA, *March 17, 1902.*

SIR: I herewith submit report of alien steerage passengers arriving at this port during the week ended March 15, 1902. March 12, steamship *Uto*, from Barranquilla, with 1 immigrant.

Respectfully,

FELIX GIRALT,

Acting Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,

U. S. Marine-Hospital Service.

REPORT OF TRANSACTIONS AT THE TRISCORNIA DETENTION STATION,
HAVANA, CUBA, WITH FINANCIAL STATEMENT FOR THE PERIOD OF
FOUR MONTHS, JULY, AUGUST, SEPTEMBER, AND OCTOBER, 1901.

[By Frank E. Menocal, acting assistant surgeon, U. S. Marine-Hospital Service, superintendent immigration department.—Respectfully submitted to the Supervising Surgeon-General, U. S. Marine-Hospital Service, Washington, D. C., by A. H. Glennan, surgeon, U. S. Marine-Hospital Service, chief quarantine officer for the island of Cuba.]

HAVANA, CUBA, *March 17, 1902.*

Upon the recommendation and under the supervision of the chief quarantine officer for the island of Cuba, strict quarantine measures were enforced in Havana against yellow fever infected ports in Mexico and Central America, from July 1 to October 31, 1901.

The distance from said ports to Havana is covered in from seventy to ninety hours from Vera Cruz, Mexico, via Progreso; from thirty to forty hours from Progreso, Mexico, direct; from sixty to seventy from Vera Cruz direct, and from ninety to one hundred and five direct from Tampico, Mexico. This time being shorter than the incubative period of yellow fever, it becomes necessary to impose upon nonimmunes a detention for the complementary time to complete five days from the departure from the infected port.

I personally inspected the passengers on board the steamers, and those who produced evidence of their immunity were allowed immediate landing and the nonimmunes were transferred to the Tricornia Station until five days detention was completed. During their detention they were systematically submitted to a biquotidian examination, their temperature having been taken and recorded twice a day.

All cases of fever were immediately transferred to a mosquito-proof pavilion, and from there to Las Animas Hospital, as soon as any suspicious symptoms appeared. All measures against the possible spread of yellow fever were enforced in accordance with the new theory of its transmission through the infected mosquito (*Stegomyia*). Extreme care had been taken to avoid the presence in or around the station of any deposit of stagnant water that might become a suitable nidus for their larvæ.

At the beginning of the rainy season the station became infected with mosquitoes, many of them being of the genus *Stegomyia*; they were more abundant in the old San Diego fort. After a careful search many breeding places were found full of larvæ; all such places were filled or drained, and after a week not a single mosquito was seen in the station and very few in the fort, all having been probably blown away by the wind.

With the exception of a few invasions at the fort, all the premises have been free of mosquitoes during the year, every receptacle being

carefully covered with wire netting or oiled, and every pool drained or dried. In fact the whole camp has been drained, and the sewage disposed of in such way as to prevent the formation of pools of stagnant water.

The detention station is located on the high part of the hill, east of Cabanas Fortress, at the northwest end of the immigration station, from which it is separated by a double barbed-wire fence, 8 feet apart. It has a surface of about 63,000 square yards.

First-class passengers are quartered in a barrack containing 10 cabins, each with capacity for 2. Second and third class passengers have another barrack with capacity for 40 or more. Women have small rooms.

Besides these 2 main buildings, the shower baths, lavatories, laundry, and cans are all contained within a small building, divided in 4 compartments, according to class and sex.

Passengers are transported in a stage from the wharf to the station. The cooking is done at immigration station kitchen.

During the quarantine season 39 steamers arrived from Mexican and Central American yellow fever infected ports, with 922 passengers—521 from Vera Cruz, 382 from Progreso, 18 from Tampico, and 1 from Carthagena. Three hundred and ninety-two were allowed immediate landing upon evidence of their immunity, and 530 were transferred to the Tricornia Station and detained there. Four persons were admitted from Havana to accompany relatives or friends during their detention. Of the detained, 386 came from Vera Cruz, 127 from Progreso, 16 from Tampico, and 1 from Carthagena.

In October 1 passenger from Vera Cruz, who was taken to the station from the steamship *Havana* October 7, developed fever; on the next day suspicious symptoms appeared, and he was immediately transferred to Las Animas Hospital, where the diagnosis of yellow fever was confirmed. The case recovered.

Although surrounded by a large population of nonimmunes, the infection did not spread, precautions having been taken to avoid possible contamination of mosquitoes.

Passengers are divided into 2 classes; first class passengers were charged \$1.50 per day; second class passengers, 50 cents. Bills were collected from the steamship company that brought the passengers.

The sum allotted by the Government for subsistence of passengers quarantined was \$677.25, as follows:

Six hundred and sixty-four first-class passengers, at \$0.75.....	\$498 50	
Seven hundred and seventeen third-class passengers, at \$0.25.....	179 25	\$677 25
Actual cost of subsistence supplies purchased.....	591 12	
Unexpended balance (saving to Government).....		\$86 13
There was collected from passengers on account of subsistence charges	1,354 50	
Adding cost of equipment (which will not occur in future).....	1,306 80	
Making a total credit of		2,661 30
The cost of equipment was	1,306 80	
Operating expenses:		
Cost of subsistence supplies purchased.....	591 12	
Miscellaneous supplies	37 21	
Salaries and services	608 72	
Making a total debit of.....		2,543 85
Balance in favor of the department of		117 45
		2,661 30

Information as to the operations of the detention station for the period of four months has been compiled in tabulated form, for convenience of reference as well as to economize space, and appropriate titles prefixed to each table to show nature of information contained therein.

Reports from Matanzas, Cardenas, Isabela de Sagua, and Caibarien.

MATANZAS, CUBA, March 19, 1902.

SIR: Through the chief quarantine officer for the island of Cuba, I have the honor to submit herewith the following sanitary report of the quarantine district under my command, for the week ended March 15, 1902:

Matanzas.—Sixteen deaths occurred in the city of Matanzas during the period covered by this report, showing a mortality of 18.43 per 1,000. The principal causes of death were as follows: Tuberculosis, 4; heart disease, 3; pneumonia, 1; infectious fever, 1; nephritis, 1; arterio-sclerosis, 1; tetanus, traumatic, 1; other causes, 4. No case of infectious or contagious character was reported. Ten vessels arrived during the week; 8 of these were inspected and passed and 2 passed without inspection. Nine bills of health were issued to vessels leaving this port.

Cardenas.—Acting Asst. Surg. Enrique Saez reports that 9 deaths occurred in Cardenas during the week, of the following causes: Tuberculosis, 2; cerebral hemorrhage, 1; heart disease, 1; alcoholism, 1; la grippe, 1; tetanus, infantile, 1; other causes, 2. No case of infectious or contagious character was reported. The death rate during the week was 18.90 per 1,000. Seventeen vessels arrived during the week; 1 of

these was inspected and passed and 16 passed without inspection. Seventeen bills of health were issued to vessels leaving the port.

Isabela de Sagua.—Acting Asst. Surg. Pedro Garcia Riera reports that during the week ended March 8, 1902, 5 deaths occurred in the municipal district of Sagua of the following causes: Pneumonia, 1; hepatitis, 1; carcinoma, 1; other causes, 2. The death rate for the week was 12.22 per 1,000. For the week ended March 15, 1902, he reports that 8 deaths occurred in the municipal district of Sagua of the following causes: Tetanus, 2; pleuro-pneumonia, 1; cerebral hemorrhage, 1; enteritis, 1; tuberculosis, 1; other causes, 2. The death rate during the week was 19.56 per 1,000. Nine cases of varicella were reported. Eight vessels arrived during the week; 1 of these was inspected and passed and 7 passed without inspection. Eight bills of health were issued to vessels leaving the port.

Caibarien.—Acting Asst. Surg. Leoncio Junco reports that 2 deaths occurred in the municipal district of Caibarien of the following causes: Hemorrhage of the brain, 1; tetanus, infantile, 1. No case of infectious or contagious character was reported. The death rate during the week was 12.57 per 1,000. Five vessels arrived during the week and were passed without inspection. Two bills of health were issued to vessels leaving the port.

Respectfully,

G. M. GUITÉRAS,

Passed Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,

U. S. Marine-Hospital.

Reports from Nuevitas, Puerto Padre, Gibara, and Baracoa.

NUEVITAS, CUBA, March 10, 1902.

SIR: Through the chief quarantine officer for the island of Cuba, I have the honor to submit the following report for the quarantine district under my command, for the week ended March 8, 1902:

Six vessels arrived at this port and 8 bills of health were issued. There were 3 deaths reported—1 stillborn, 1 pneumonia, 1 fracture of the skull. A new case of varicella was recorded in town, but is doing well. The weather has been somewhat cool, with abundant rains as this report closes, and the sanitary condition is good.

Puerto Padre.—Report shows the arrival of 11 vessels, 10 bills of health issued, 3 deaths—tuberculosis, 1; 2 gunshot—and good sanitary condition.

Gibara.—Report shows 9 vessels arrived, 9 bills of health issued, 3 deaths—pulmonary tuberculosis, 1; endocarditis, 1; intestinal tuberculosis, 1.

Reports from other subports are delayed.

No quarantinable disease reported at any point in the district.

Respectfully,

OWEN W. STONE,

Acting Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,

U. S. Marine-Hospital Service.

NUEVITAS, CUBA, March 17, 1902.

SIR: I have the honor to submit inclosed report of transactions at some of the subports under my command, as follows:

Baracoa.—Weekly report of arrival of alien steerage passengers in the weeks ended November 16, November 23, and November 30, 1901.

Puerto Padre.—Report of immigrants inspected in the month of February, 1902, and reports of transactions for the week ended March 8, 1902.

Gibara.—Weekly abstract of bills of health, and weekly report of vessels arrived in the week ended March 8, 1902.

Respectfully,

OWEN W. STONE,

Acting Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,

U. S. Marine-Hospital Service.

Reports from Santiago, Manzanillo, Guantnamo, and Daiquiri.

SANTIAGO DE CUBA, *March 10, 1902.*

SIR: Through the chief quarantine officer for the island of Cuba, I have the honor to submit herewith the following report for the week ended March 1, 1902:

Santiago.—During this period there was a total of 19 deaths reported, making the annual rate mortality for the week 22.97 per 1,000. The causes of death were the following: Fever, intermittent malarial, 1; tubercle of lungs, 6; paralysis, 1; organic diseases of the heart, 1; atheroma, 1; bronchitis, acute, 1; pneumonia, 2; pulmonary congestion, 1; Bright's disease, 2; insolation, 1; unspecified or ill-defined causes of death, 2. During the week 8 vessels were inspected and passed on arrival, 6 vessels were passed without inspection, and 1 vessel was boarded and passed on medical officers' certificate. Ten vessels received bills of health prior to sailing. On February 25, 1902, the provisional flag steamship *Maria Herrera* was disinfected prior to sailing for Porto Rico. One immune and 5 nonimmune certificates were issued to passengers, and 45 pieces of baggage were disinfected by formaldehyd gas. On February 27, 1902, the French cruiser *Tage* entered this port with 2 sick and 1 man dead. The cause of death given was insolation. This man went on duty, apparently in good health, at 4 p. m. the previous day, and at 5 p. m. was taken sick and died at 2 a. m. the following morning. His temperature during this time ranged between 41 and 42° C. Of the 2 men sick, 1, diagnosed typhoid fever, was sent to the civil hospital; the other, diagnosed malarial fever, remained on board the vessel.

Manzanillo.—Acting Asst. Surg. R. de Socarras reports 2 deaths, due to the following causes: Cerebral congestion and hemorrhage, 1; diarrhea and enteritis (under 2 years), 1. Annual rate mortality for the week 7.18 per 1,000. During the week 6 vessels were inspected and passed on arrival, 1 vessel was passed without inspection, and 9 vessels received bills of health prior to leaving port. He investigated some reported cases of smallpox at Campechuela and found that these were cases of varicella.

Guantanamo.—Acting Asst. Surg. H. S. Caminero reports 4 deaths, due to the following causes: Fever, pernicious malarial, 1; cancer of the uterus, 1; organic diseases of the heart, 1; burns, 1. Annual rate mortality for the week, 11.55 per 1,000. During the week 2 vessels were inspected and passed on arrival, 3 vessels were passed without inspection, and 2 vessels received bills of health prior to departure. The case of smallpox reported last week is doing fairly well. No new cases have been reported.

Daiquiri.—Acting Asst. Surg. Juan J. de Jongh reports that no deaths

have occurred. One vessel was inspected and passed on arrival and 1 bill of health was issued.

Respectfully,

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

R. H. VON EZDORF,
Assistant Surgeon, U. S. M. H. S.

Inspection of immigrants at Santiago de Cuba during the week ended March 1, 1902.

SANTIAGO DE CUBA, *March 1, 1902.*

SIR: I herewith submit report of alien steerage passengers arriving at this port during the week ended March 1, 1902. February 28, provisional flag steamship *Julia*, from San Juan, P. R., with 12 immigrants. March 1, provisional flag steamship *Tomas Brooks*, from Kingston, Jamaica, with 13 immigrants. Total, 25.

Respectfully,

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

R. H. VON EZDORF,
Assistant Surgeon, U. S. M. H. S.

ENGLAND.

Report from Liverpool.

LIVERPOOL, ENGLAND, *March 8, 1902.*

SIR: I have the honor to state that for the week ended March 8, 1902, there were reported to the city health authorities 22 cases of smallpox; enteric fever, 13 cases; scarlet fever, 116; diphtheria, 20; and measles, 13. The smallpox originated in the city and does not seem to be in any way connected with the shipping. On March 4, 1902, I vaccinated, when necessary, the officers, crew, and cattlemen of the Johnston Line steamship *Indore*, bound for Baltimore, and on March 5, 1902, did the same to the officers, crew, and cattlemen of the Warren Line steamship *Sagamore*, bound for Boston.

Respectfully,

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

CARROLL FOX,
Assistant Surgeon, U. S. M. H. S.

Report from London.

LONDON, ENGLAND, *March 12, 1902.*

SIR: I have the honor to report that for the week ended March 8, 1902, 7 vessels left this port for ports in the United States, and there were vaccinated of the crews of these vessels 122 persons, 1 steamship having its own surgeon vaccinate its crew, and that number is not included in the above. The number of cases of smallpox reported continues about the same, and there were on the 10th instant 1,558 cases under treatment. The lay press reports that there are 208 cases of the disease in hospital in Glasgow. For the week ended March 1, there were 84 deaths from smallpox in England, 75 of which occurred in London, 7 in West Ham, 1 in Tottenham, and 1 in Swansea. For the same period there were 10 deaths from this disease in Glasgow.

For the week ended February 27, there were 7 cases and 3 deaths from plague in Mauritius. In Egypt, for the week ended February 23,

there were 8 cases and 3 deaths. Concerning the newspaper reports that plague was present at Zaandam, Holland, I am informed by the consul at Amsterdam that there is nothing known of it there, and it is probably pure fabrication.

Respectfully,

A. R. THOMAS,

Passed Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,

U. S. Marine-Hospital Service.

GERMANY.

Reports from Berlin—Plague and cholera in various countries.

BERLIN, GERMANY, March 7, 1902.

SIR: I have the honor to transmit the following information obtained from the imperial health office at Berlin:

Plague.

TURKEY.—In Bagdad during the period from January 1 to February 10, there were recorded 14 plague cases and 10 deaths.

EGYPT.—Between February 14 and February 20, the following plague cases were registered: In Tantah, 3 cases and 3 deaths; in Kom-el-Nur, 3 cases and no deaths; in Alexandria, 1 case and 1 death.

BRITISH INDIA.—In the Bombay Presidency during the period from January 25 to January 31, there were registered 5,786 plague cases and 4,285 deaths—that is to say, 824 cases and 584 deaths less than during the foregoing week. In the city of Bombay, between January 22 and January 28 (from January 29 to February 4), there were recorded 477 (602) plague cases and 347 (536) deaths.

HONGKONG.—Since the beginning of October last the colony had been declared free from plague. But in the middle of December a fresh plague case with fatal termination was recorded.

CAPE COLONY.—During the week from January 26 to February 1, 1 fresh case of plague was registered at Mossel Bay.

NEW SOUTH WALES.—In Sydney, between January 15 and January 22, 5 fresh plague cases were registered.

Plague and cholera.

BRITISH INDIA.—In Calcutta during the period from January 12 to January 25 there occurred 112 deaths from cholera. There were also recorded 117 cases of plague with 111 deaths.

Increase of carcinoma in Germany.

Government counsellor Dr. Wutzdorff, head of this department of the imperial health office in Berlin, has recently delivered a lecture on the above subject before the committee for the study of cancer. The Deutsche Medicinische Wochenschrift has just published a synopsis of this lecture, from which we take the following results, which Dr. Wutzdorff has arrived at by a careful and critical use of the statistics concerning the spread of cancer in the German Empire:

1. In the German Empire, according to the official statistics, carcinoma has increased considerably during the period from 1892 to 1898, notably in Hamburg, and in the province Posen, also in Bavaria left of the Rhine. The increase was less marked in the province of Hanover and the kingdom of Saxony, in Westphalia, Hessen, and East

Prussia. A decrease was alone recorded in Hohenzollern and Saxe-Coburg-Gotha.

2. To judge from the number of deaths from carcinoma recorded in the year 1898, this disease occurs most frequently among the population of the Lubeck and Hamburg districts, in Baden, Bavaria right of the Rhine, Berlin, Hessen, Wurtemberg, kingdom of Saxony, Brunswick, and in the district of Bremen. Cancer occurs less frequently among the inhabitants of Schaumburg-Lippe, province Posen, Saxe Coburg-Gotha, Westphalia, Hohenzollern, East Prussia, and the Rhine Province.

3. Apart from the youngest-age classes of the population, for which, owing to the small numbers coming into consideration, statistical conclusions can not be drawn, the number of deaths from cancer has increased in a considerably greater proportion than the growth of the population. The assumption that the higher-age classes participate alone or mainly in this increase, is not confirmed by the statistics.

4. Cancer, at the present time, attacks the population of Germany, on the average, at a younger age than formerly.

5. Women more frequently suffer with carcinoma than men, although the danger for men is greater than for women.

Respectfully,

FRANK H. MASON,
United States Consul-General.

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

ITALY.

Report from Naples—Smallpox in Naples and Palermo.

NAPLES, ITALY, March 3, 1902.

SIR: I have the honor to report that for the week ended March 1, 1902, the following ships were inspected at Naples: February 25, the steamship *Citta di Torino*, of the Veloce Line, bound with passengers and cargo for New York. There were inspected and passed 1,436 steerage passengers and 66 pieces of large baggage; 2,000 pieces of baggage were disinfected by steam. February 26, the steamship *Sardegna*, of the Italian General Navigation Company, bound with passengers and cargo for New York. There were inspected and passed 1,052 steerage passengers and 26 pieces of large baggage; 1,500 pieces of baggage were disinfected by steam. February 27, the steamship *Aller*, of the North German Lloyd Steamship Company, bound with passengers and cargo for New York. There were inspected and passed 778 steerage passengers and 50 pieces of large baggage; 1,200 pieces of baggage were disinfected by steam. March 1, the steamship *Massilia*, of the Fabre Line, bound with passengers and cargo for New York. There were inspected and passed 1,043 steerage passengers and 100 pieces of large baggage; 1,700 pieces of baggage were disinfected by steam.

Smallpox at Naples.

During the week ended March 1, 1902, there were officially reported at Naples 9 cases and 1 death.

Smallpox at Palermo.

It is reported that there is a considerable number of cases of smallpox at Palermo. All emigrants' baggage from that city is being disinfected and a careful lookout being kept for cases of smallpox.

Plague in Egypt.

A report from Cairo, dated February 24, 1902, states that during the week then passed there were 4 cases of plague and 4 deaths at Alexandria. Since April 7, 1901, the beginning of the epidemic, there have been in Egypt 304 cases of plague and 184 deaths.

Respectfully,

J. M. EAGER,

Passed Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,

U. S. Marine-Hospital Service.

JAMAICA.

Yellow fever at Port Royal.

KINGSTON, JAMAICA, *March 6, 1902.*

SIR: I have the honor to report that it was rumored on the 4th that there were several cases of yellow fever at Port Royal, but I was unable to ascertain the truth of the rumor until late in the afternoon of that day, and early the following morning I saw the superintendent of the island medical office, who told me that 3 cases of yellow fever had developed in the barracks among the troops at Port Royal; that the troops had immediately been sent to the mountain, and that the authorities were not apprehensive of any further trouble on that score. He also stated that there was no communication between Port Royal and Kingston, 5 miles distant (in a direct line), across the bay. Under these circumstances, and in view of the further fact that the health of this port is good, I did not report the 3 cases of yellow fever at Port Royal by cable, though I noted the facts of the report of the 3 cases at Port Royal on the bills of health applied for after the report had been confirmed.

Respectfully,

WILLIAM B. SORSBY,

United States Consul.

HON. ASSISTANT SECRETARY OF STATE.

NEW BRUNSWICK.

Inspection of immigrants at St. John and Halifax.

ST. JOHN, NEW BRUNSWICK, *March 17, 1902.*

SIR: I have the honor to report that for the week ended March 15 there were inspected 699 immigrants; passed, 688; detained, 11; cause of detention, acute dysentery, 1; granular conjunctivitis, 2; hernia, 4; infected wound of hand, 1; trachoma, 3. During the week ended March 15 there were inspected at the port of Halifax 250 immigrants; passed, 245; detained, 5; cause of detention, granular conjunctivitis, 1; loss of right leg, 1; trachoma, 3.

Respectfully,

VICTOR G. HEISER,

Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,

U. S. Marine-Hospital Service.

*Inspection service at St. John.*ST. JOHN, NEW BRUNSWICK, *March 18, 1902.*

SIR: I have the honor to report that during the week ended March 15 the following vessels and their crews were inspected at this port: Steamer, 1; schooners, 7; seamen, 100.

Respectfully,

T. DYSON WALKER,
United States Medical Inspector.

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

PHILIPPINE ISLANDS.

Cholera at Manila.

[Cablegram.]

MANILA, P. I., *March 24, 1902.*

WYMAN, *Washington*: Cholera is now present at Manila; 18 cases. Think the disease was introduced by vegetables, Canton. The local board of health is taking all necessary steps to control. Quarantine rigid.—PERRY.

*Reports from Manila—Improvement in health conditions.*MANILA, P. I., *February 14, 1902.*

SIR: I have the honor to report that Manila, has remained free from plague and smallpox during the month of January, 1902, and that no cases of either disease occurred during the week ended February 8, 1902.

The condition is much better than in previous years, but it is too early to predict the proportions plague may assume later. Although the weather has been exceptionally cool, I do not attribute this as a factor, but think the cleaning of the houses and the closing of several badly infected centers of last year have done much to lessen the prevalence of the disease.

Respectfully,

J. C. PERRY,
*Passed Assistant Surgeon, U. S. M. H. S.,
Chief Quarantine Officer for the Philippine Islands.*

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

MANILA, P. I., *February 14, 1902.*

Chief Quarantine Officer for the Philippine Islands.*

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

PORTO RICO.

Reports from San Juan and subports.

SAN JUAN, P. R., March 8, 1902.

SIR: I have the honor to submit herewith the following report of the quarantine transactions of the service at this and the 6 subports of the island of Porto Rico for the month of February, 1902:

San Juan.—Number of vessels inspected, 19; number of bills of health issued, 30; number of vessels held in quarantine, 3; number of persons detained in quarantine at the quarantine station, none; number of persons vaccinated, none; number of vessels disinfected, none; number of pieces of baggage disinfected, 83; number of sacks of mail disinfected, 2.

On the 1st instant the French steamship *Alexandre Bixio*, from Colon and South American ports, entered, and was placed in quarantine under guard. She brought no passengers or freight for Porto Rico, and was permitted to take on cargo for European ports while in quarantine. The vessel sailed on the following day, the 2d instant.

On the 18th instant the French steamship *Saint Simon*, from St. Marc, Gouaives, Petit Goave, Port au Prince, Cape Haitien, Puerto Plata, and Sanchez, and the Spanish steamship *Montevideo*, from Havana, Port Limon, Colon, Barranquilla, Puerto Cabello, and La Guayra, via Ponce, arrived. Both steamships were placed in quarantine under guard. Bills of health carried by both steamships were clean, and as the passengers for Porto Rico from each steamship were considered immune they were permitted to land. Forty-three pieces of baggage, with 1 sack of mail, from the French steamship, and 7 pieces of baggage from the Spanish steamship, were removed to the island and subjected to disinfection by formalin.

The provisional flag steamship *Julia*, from Cuban and Dominican ports, entered upon the 19th instant on her regular schedule. She had, as usual, undergone disinfection at Santiago de Cuba. This steamship was given free pratique, 30 pieces of baggage being removed to the island and disinfected.

The provisional flag steamship *Maria Herrera* arrived upon the 28th instant from Cuban and Dominican ports. She had been disinfected at Santiago de Cuba, as usual, and was given free pratique. Three pieces of baggage and 1 sack of mail were removed to the island and disinfected. All passengers for Porto Rico were permitted to land.

I inclose herein the vital statistics of San Juan.

The following embraces summary of the reports received from the several subports as to vessels inspected in February, 1902: Mayaguez, 11; Arecibo, 3; Humacao, 5; Aguadilla, 1; Arroyo, 2; Fajardo, 3.

The following is a report of the mortality at the subports: Mayaguez, 73; Arecibo, 75; Humacao, 44; Aguadilla, 28; Arroyo, 11; Fajardo, 27.

Respectfully,

H. S. MATHEWSON,
Passed Assistant Surgeon, U. S. M. H. S.,
Chief Quarantine Officer for Porto Rico.

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

[Inclosure.]

Smallpox in San Juan.

SAN JUAN, P. R., March 7, 1902.

SIR: I have the honor to report that during the four weeks ended March 1, 1902, 14 cases of varioloid, with no deaths, are reported as occurring in the city of San Juan. In Ponce and Utuado a suspicious eruptive disease made its appearance during the month of February, but this has been officially diagnosed as chicken pox.

Respectfully,

H. S. MATHEWSON,
Passed Assistant Surgeon, U. S. M. H. S.,
Chief Quarantine Officer for Porto Rico.

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

Reports from Ponce.

PONCE, P. R., March 10, 1902.

SIR: Through the chief quarantine officer for Porto Rico, I have the honor to transmit herewith the quarantine and abstract of bills of health reports for this city for the week ended March 8, 1902, also the summary of transactions of this station, and mortality report of the city for the month of February, 1902. Four vessels were inspected and passed and 5 bills of health were issued during the week. Nothing of interest in sanitary or quarantine lines has occurred.

Respectfully,

W. W. KING,
Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

Foreign and insular statistical reports of countries and cities—Yearly and monthly.

AUSTRALIA—Queensland—Brisbane.—Month of January, 1902. Estimated population, 119,425. Total number of deaths, 155, including diphtheria, 1; enteric fever, 1; whooping cough, 2, and 12 from tuberculosis.

Month of February, 1902. Total number of deaths, 160, including enteric fever, 4; whooping cough, 3, and 15 from tuberculosis.

New South Wales—Sydney.—Month of January, 1902. Estimated population, 383,386. Total number of deaths, 508, including diphtheria, 3; enteric fever, 13; measles, 6; scarlet fever, 2; whooping cough, 21; bubonic plague, 1, and 43 from tuberculosis.

BAHAMAS—Dunmore Town.—Two weeks ended February 28, 1902. Estimated population, 1,232. No deaths and no contagious diseases.

Governors Harbor.—Two weeks ended February 27, 1902. Estimated population, 1,375. Two deaths. No contagious diseases.

Green Turtle Cay—Abaco.—Two weeks ended February 26, 1902. Estimated population, 3,314. No deaths and no contagious diseases.

Nassau.—Two weeks ended March 5, 1902. Estimated population, 12,535. Number of deaths not reported. No contagious diseases reported.

BRAZIL—Pernambuco.—Two weeks ended January, 31, 1902. Estimated population, 200,000. Total number of deaths, 283, including whooping cough, 2; smallpox, 65, and 32 from tuberculosis.

FRANCE—Nantes.—Month of February, 1902. Estimated population, 130,000. Total number of deaths, 245, including enteric fever, 1; whooping cough, 1, and 57 from tuberculosis.

Roubaix.—Month of February, 1902. Estimated population, 124,660. Total number of deaths, 197, including measles, 7; whooping cough, 2, and 1 from smallpox.

GIBRALTAR.—Two weeks ended March 2, 1902. Estimated population, 27,460. Total number of deaths, 43, including 3 from measles.

GREAT BRITAIN—England and Wales.—The deaths registered in 76 great towns in England and Wales during the week ended March 1, 1902, correspond to an annual rate of 23.3 per 1,000 of the aggregate population, which is estimated at 14,862,003.

London.—Two thousand four hundred and seventy-eight deaths were registered during the week, including measles, 67; scarlet fever, 10; diphtheria, 41; whooping cough, 46; enteric fever, 7; smallpox, 75, and diarrhea and dysentery, 14. The deaths from all causes correspond to an annual rate of 28.2 per 1,000. In Greater London 3,344 deaths were registered. In the "outer ring" the deaths included 6 from diphtheria, 8 from measles, 2 from scarlet fever, 17 from smallpox, and 4 from whooping cough.

Ireland.—The average annual death rate represented by the deaths registered during the week ended March 1, 1902, in the 21 principal

town districts of Ireland was 29.3 per 1,000 of the population, which is estimated at 1,092,322. The lowest rate was recorded in Londonderry, viz, 15.4, and the highest in Galway, viz, 54.4 per 1,000. In Dublin and suburbs 218 deaths were registered, including enteric fever, 3; measles, 1; scarlet fever, 1; whooping cough, 5, and 42 from tuberculosis.

Scotland.—The deaths registered in 8 principal towns during the week ended March 1, 1902, correspond to an annual rate of 22.6 per 1,000 of the population, which is estimated at 1,629,923. The lowest mortality was recorded in Paisley, viz, 17.3, and the highest in Dundee, viz, 26.3 per 1,000. The aggregate number of deaths registered from all causes was 729, including diphtheria, 1; measles, 19; scarlet fever, 4; smallpox, 10, and 23 from whooping cough.

JAMAICA—Kingston.—Month of February, 1902. Estimated population, 46,542. Total number of deaths, 95, including 9 from phthisis pulmonalis.

JAVA—Batavia.—Three weeks ended January 25, 1902. Estimated population, 150,000. Number of deaths not reported. No epidemic or contagious diseases.

SPAIN—Barcelona.—Two weeks ended February 28, 1902. Estimated population, 672,000. Total number of deaths not reported. Eight deaths from enteric fever reported.

Corunna.—Month of February, 1902. Estimated population, 44,000. Total number of deaths, 125, including enteric fever, 1, and 30 from tuberculosis.

Malaga.—Month of January, 1902. Estimated population, 133,000. Total number of deaths, 371, including enteric fever, 7, and 15 from smallpox.

Vigo.—Month of February, 1902. Estimated population, 20,000. Total number of deaths, 59, including 1 from smallpox.

SWITZERLAND.—Reports for the two weeks ended February 8, 1902, from 18 cities and towns, having an aggregate estimated population of 770,000, show a total of 534 deaths, including diphtheria, 11; enteric fever, 2; measles, 7; scarlet fever, 1; whooping cough, 13, and 77 from phthisis pulmonalis.

Reports for the two weeks ended February 22, 1902, from 18 cities and towns, having an aggregate estimated population of 770,000, show a total of 528 deaths, including diphtheria, 7; enteric fever, 1; measles, 6; scarlet fever, 1; whooping cough, 9, and 72 from phthisis pulmonalis.

WEST INDIES—St. Thomas.—Three months ended December 31, 1901. Estimated population, 14,007. Total number of deaths, 85, including enteric fever, 1, and 12 from phthisis pulmonalis.

Cholera, yellow fever, plague, and smallpox, December 27, 1901, to March 28, 1902.

[Reports received by the Surgeon-General United States Marine-Hospital Service from United States consuls through the Department of State and other sources.]

[For reports received from June 29, 1901, to December 27, 1901, see PUBLIC HEALTH REPORTS for December 27, 1901.]
